## NAD+ TREATMENT

---

### \$500 EACH FOR MONTH 1 AND 2 ADDITIONAL TREATMENTS EXTRA

NAD+ stands for Nicotinamide Adenine Dinucleotide and it is an essential molecule found in every cell in your body. It is a co-enzyme of Vitamin B3 (Niacin) which means it is a small helper molecule that binds to a protein molecule in order to activate an enzyme. Enzymes are responsible for over 5,000 different biochemical reactions throughout the body and NAD+ participates in more reactions than any other vitamin-derived molecule.

As we age, NAD+ depletes and does not regenerate. Replenishing your cells can significantly help the side effects of age-related diseases.

At the end of treatment with NAD+ Therapy, clients have generally reported the following benefits:

- Increased Energy
- Increased Mood
- Increased Mental Clarity
- Increased Focus and Concentration
- Increased Memory
- Decreased Pain
- Improved eyesight and hearing
- Enhanced sense of purpose
- Reduced cravings of substances

The ultimate in brain rejuvenation, NAD+ is brain refuel. A derivative of Vitamin B3, this series of IV Vitamin therapy will help you to perform better, think better, focus better, and FEEL better with more energy than you thought possible.

You can think of it like putting gas in your car. Your body needs NAD+ like a car needs gas to go.
